Engineers India(IEI)

About Me

I am a recent graduate in Computer Science Engineering with average knowledge of python,C,SQL Although i have no professional experience, I am highly motivated to enhance my skills and put them into practice.I am enthusiastic about expanding my language skills and acquiring new concepts to become a professional. I am eager to join a dynamic team where I can contribute, learn, and grow professionally.

Education

G.H.S.Sreekaryam
(2015-2016)

High School

I Completed 10th grade in state syllabus and achieving a score of 95.46

SNGHSS Chempazhanthi
(2018-2019)

Higher Secondary

completed 12th grade in state syllabus, specializing in Computer Science and securing a score of 66.42.

St.Thomas Institute for Science and Technology
(2019-2023)

Bachelor of Technology

completed Bachelor's degree in computer science Engineering with a CGPA of 7.34

Project

Plant Leaf Disease Detection System

As part of my academic project,I developed a plant Leaf Disease Detection System utilizing the VGG19 deep learning model.This project showcased my proficiency in deep learning techniques and their potential impact on agriculture and crop management

College Bus Tracking System

As part of my minor project, I developed an android application aimed at tracking college buses using location sharing. The applicatin allowed users to trackthe real-time location at the college buses. This project showcased my skills in mobile app development.
